GOND RAND
GLOBAL TRANSPORTS & LOGISTICS

Our employees come from all over the world. Which is why Gondrand is at home worldwide.

Founded in 1866, Gondrand is an international freight forwarder and logistics provider. Our network brings together experts from the most diverse countries and cultures. Thanks to their experience and commitment to the job that is guaranteed every day, you as a client of Gondrand can be sure of receiving personal attention and first-class services tailored to your specific needs.

Many roads lead to Gondrand. But only one to your destination.

Overland transport with Gondrand means getting your goods to their destination reliably and fast. Together with our partners, we cover the entire European road network, from Sicily to the North Cape and from Portugal to the Urals. But Gondrand would not be Gondrand, if we confined ourselves to forwarding alone. Which is why we provide a whole range of additional services to help our customers handle their material flows.

We send air freight goods to all the world's big cities. And to the remotest corners of the globe.

Gondrand ensures that your air freight arrives punctually. As a partner of the leading airlines, we can always offer you the cargo capacity you need. And you get to benefit from a full range of services, from collection and delivery through to courier services and the forwarding of hazardous goods and customs clearance. And if you wish, we can charter a whole aircraft so that your goods can be forwarded not only to the world's big cities, but even to the remotest corners of the globe.

Lee Wang Sea freight Manager

Sea freight does not end at the port. It ends on the destination doorstep.

With Gondrand, you have at your disposal a partner with decades of experience in sea freight. We are present at the world's most important sea ports and work together closely with selected agents and reputable shipping lines. And our specialists do far more than just booking a container. They take care of all the necessary paperwork and are responsible for the handling and tracking of your shipment too. In short, they do everything necessary to ensure that your goods arrive safely.

Michael de Brauw Warehouse Manager

Logistics comes from the word logic. So it is only logical that it should make sense.

It goes without saying that any warehousing solution we offer will be tailored to your precise needs. Furthermore, by relieving you of your logistics work, including the complete coordination of your material flows, we enable you to concentrate on your core business – which after all is what you do best. You can outsource all your logistics if you wish. And having a partner you can talk to directly, makes business so much easier.

Benoît Thibault Sales Manager Air freight

Want to ship a spare part abroad? Or a whole factory, perhaps?

We are a partner you can count on even for projects that are anything but ordinary. Whether it is a giant turbine that has to be transported across Europe or an entire factory which has to be moved to South America, our specialists will take care of the cost calculation and planning, will select the most effective mode of transport and organize the turnkey rebuilding of your plant at the other end.

Bettina Ziegler Internet and Communication

What we do transcends all borders. Especially when it comes to customs.

Attention to detail is vital if everything is to go smoothly. Customs issues such as commercial documents, permits, licences, import and export embargoes and the like are crucial in today's globalized world. With Gondrand, however, you need not fear annoying surprises. On the contrary, with our experienced customs experts personally present at ports, border crossings and terminals worldwide, you can be sure that your goods will get moving again, while others are still held up at the frontier.

Nurdan Arikci Sales Representative

We began providing special transport services 100 years ago. But still devote the same care and attention as on day one.

Plants, fresh products, personal effects, entire art collections – anything that is particularly fragile or perishable is in good hands with us. We take care of everything from packaging and storing to insurance and all the other transit formalities as well. We are especially experienced in trade fair and exhibition logistics. So opting for a customized solution from Gondrand is bound to be a good choice.
